

Next-level Location Intelligence to Stop Online Fraud

Today's merchants, both large and small, are relying on payment providers to provide a secure environment for their customers to transact safely and seamlessly on the internet. But without knowing a customer's true location, your merchants are missing a key piece of data to determine if they're transacting with a legitimate customer or a fraudster.

To help your merchants improve their authorization rates and block bad actors, GeoComply offers next-level location intelligence. Our unique approach to collecting, verifying and analyzing location data brings a new set of insights for fraud and risk management, so you can:

Increase protection against account takeovers, with no user friction.

Augment existing risk engines with accurate location data.

Amplify your VPN and proxy detection with the industry's gold-standard IP database.

Location intelligence: the heart of effective anti-fraud solutions
