

All-in-one KYC and AML solution

Achieve the industry's highest verification rate through a multi-vendor waterfall workflow.

IDComply streamlines your KYC and AML processes.

Increase user acceptance

Check users' IDs against multiple KYC vendors to improve verification while providing a frictionless user experience.

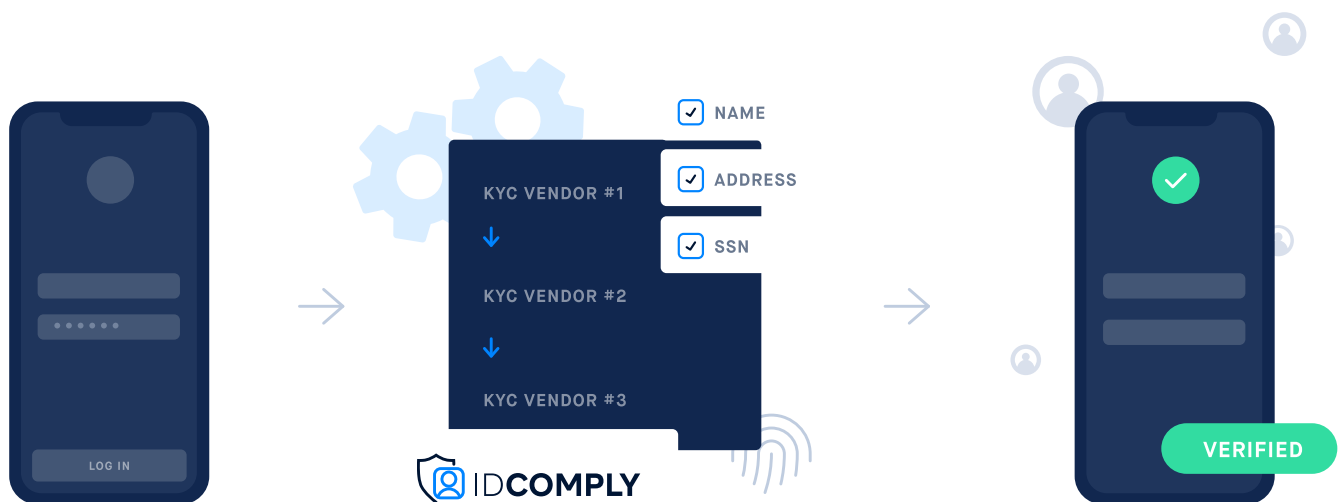

Streamline multi-state KYC

Reduce your compliance overhead by using IDComply's compliance engine to stay on top of KYC requirements across all jurisdictions.

Reduce manual verifications

Improve success rates through automated data verification that reduces the need for manual reviews.

Move from a single vendor of ID and age verification to a multi-vendor model, all through one API call.

Key Features

Up-to-date compliance engine

Ensures compliance by checking users against up-to-date, multi-jurisdiction requirements.

Multi-vendor waterfall workflow

Process waterfall for knowledge-based authentication (KBA) and ID verification, allowing for multiple layers of verification.

Improved user experience

Uses best practice UX for successful consumer onboarding and reduced fail rates.

AML and enhanced due diligence

Real-time risk monitoring to protect consumer transactions – including sanctions and blacklist screenings, and customer profiling features.

User privacy

IDComply only stores anonymized applicant data as the GUPI (Global Unique Player Identification).

Fast implementation via API

Single point of integration for multiple vendors and verification processes.

A seamless experience for digital ID verification

Increase verification rates – simplify user onboarding by automating data collection from a driver's license or passport.
