

IDComply All-in-one identity verification solution for iGaming

What is IDComply?

IDComply is an end-to-end identity verification solution. It is designed to meet the unique identity verification needs of the gaming world, ensuring a seamless and secure experience for your users. Employing advanced multi-source verification, IDComply elevates your pass rate and helps shield against identity fraud. It draws insights from billions of iGaming transactions*.

Why IDComply?

Comprehensive verification

Utilize various KYC methods, such as data verification, photo ID verification, KBA, CfA* and PEP/OFAC checks

Seamless KYC compliance

Comply with state-specific requirements, freeing your team from tracking regulatory changes and guarding against compliance issues

Dedicated expert team

An in-house professional team assesses your registration form and verification settings, providing insights on how to enhance your overall user experience

Adaptable & cost-efficient

Customize your verification process, ensuring data accuracy, detecting fraud early on*, preventing unnecessary checks, and reducing acquisition costs

*Core for Authentication (CfA) required for this feature

End-to-end user verification

Verify identities with an end-to-end solution

Leverage our advanced multi-source verification that examines different aspects of user identities to improve data accuracy and pass rates

Make informed decisions

Track performance in real-time with detailed reports and visuals for actionable insights, like understanding user abandonment reasons

Seamlessly integrate with your KYC strategy

Avoid the complexity of integrating multiple providers. Opt for our easy-to-integrate solution for the best of both worlds
